Exploring Dog Senses

(about 60 minutes)

Brownie Girl Scouts Grades 2 – 3

How is a dog's world different from our own? How is it the same? Did you know that search and rescue dogs track people by microscopic flakes of skin that create a scent they can follow, even through water? The dog's ancestor, the wolf, can hear through 5 miles of forest and 10 miles of open country. With spectacular pictures and sound clips, students explore how the dog takes in its world through its senses.
